# BATH & ROOM THERMOMETER

---

## Digital Waterproof Floating Thermometer

The new MOBI Bathtub Thermometer allows you to effortlessly determine the temperature of your child's bath water or room. The thermometer takes the temperature once every second, giving you an accurate and constant measurement. When the bath is over, place the thermometer in the baby's nursery, and use it as a room thermometer. In addition to the current temperature, the unit's internal memory automatically keeps track of the highest and lowest temperature in the room so you know your baby's room temperature is always in a comfortable range.

---

### Features & Benefits:

- Floating waterproof thermometer
- Indoor or outdoor use
- Minimum & Maximum temperature memory
- Data hold function
- Displays temperature in °C or °F
- Large digital readout
- Quick response checks temperature once every second for quick and accurate measurements

### Other Uses:

- Temperature tester for small children or adult swimming pool or Jacuzzi.
- Portable room thermometer is perfect to take for travel, vacations or day trips
- Outdoor thermometer for outdoor club houses, backyard play sets and other outdoor spaces
